

Planning**ANNUAL AND LONG RANGE PLANNING**

An Annual and Long-Range Educational Facilities Plan, as required by the Florida State Department of Education, will be maintained and kept up-to-date.

The plan will reflect the needs of current instructional procedures and projected educational programs, and will incorporate population projections, enrollment projections, site acquisition needs, school plant placement and determination of financial needs for providing the necessary school facilities.

In developing the plan for school facilities, the Board recognizes the importance of mutual cooperation and exchange of planning information with other governmental agencies in the area which are concerned with population projections and housing developments such as the Metropolitan Planning Department, Miami Housing Authority, and similar agencies. To achieve the cooperation deemed desirable, the Board directs that procedures be established which will provide for mutual exchange of planning information.
