

Planning**PORTABLE/RELOCATABLE CLASSROOMS ALLOCATION FORMULA**

An allocation formula has been developed for the equitable distribution of new and existing portable/relocatable classrooms that considers the following factors:

- Assigned Program Capacity - Permanent Facility
 - Current Student Membership
 - Maximum Expected Student Membership Current Year
 - Estimated Student Membership Next Year
 - Number of Portables Already On-Site
 - Non-Instructional Space Being Utilized for Instructional Purposes
 - Number of Standard Classrooms Subdivided
 - Number of Standard Classrooms Subdivided for Chapter 1 Purposes
 - Number of ESE Students Housed in Portable/Relocatable Classrooms
 - Number of Standard Classrooms Used in Resource Rooms
 - Number of Floating Teachers (Elementary Schools Only)
 - Number of Vacant Classrooms (Secondary School Only)
1. The formula will be used to identify portable/relocatable classrooms for reassignment.
 2. The specific number of portable/relocatable classrooms to be allocated during the subsequent school year will be determined by combining the number of temporary facilities that have been identified for reassignment and the number of new portable/relocatable classrooms that are projected to be constructed, subject to funding availability.
 3. The Region Superintendent shall make recommendations to the Deputy Superintendent of School Operations or designee for review and all final decisions.

Specific Authority: 230.22(2) F.S.

Law Implemented, Interpreted, or Made Specific: 230.23(4); 230.33(6) F.S.
