- I. **MAJOR CONCEPTS/CONTENT:** The purpose of this program is to prepare students for employment in the financial industry. This program also provides supplemental training for persons previously or currently employed in the financial industry. This program focuses on broad, transferable skills and stresses understanding and demonstration of the following elements of the financial industry: planning; management; finance; economics; technical and production skills; underlying principles of technology; labor issues; community issues and health, safety, and environmental issues; risk management liability; and health, life, and disability insurance.

Listed below are the courses that comprise this program when offered at the secondary level:

8815150 - Financial Computing
8815140 - Financial Accounting
8815110 - Financial Operations
8815130 - Financial Internship OR 8800410 - Marketing OJT
8815120 - Financial Planning

- II. **LABORATORY ACTIVITIES:** Laboratory activities are an integral part of this program. Industry specific equipment should be utilized for each job for which the student receives instruction.
- III. **SPECIAL NOTE:** DECA, "An Association of Marketing Students" (secondary), and Delta Epsilon Chi, "An Association of Marketing Students" (postsecondary), are the appropriate career and technical student organizations for providing leadership training and for reinforcing specific career and technical skills. Career and Technical Student Organizations, when provided, shall be an integral part of the career and technical instructional program, and the activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065 (8), FAC.

Cooperative training (OJT), 8800410/M89990/0208.9999CP, or Financial Internship, 8815130, are the appropriate work-based learning experiences for this program. Whenever OJT is offered a training agreement and an individualized training plan, signed by the student, parent/guardian, teacher/coordinator, and employer are required. The training plan is to include a diverse list of instructional objectives and on-the-job skills and in-school learning experiences. The workstation should reflect equipment, skills, and tasks relevant to the occupation the student has chosen as a career goal. The student must receive compensation for work performed. The employer will evaluate the student's job performance of the instructional objectives and competencies each grading period.

Students who choose the internship option must work a minimum of 150 hours to earn one credit. Each student intern is required to have a job performance skills plan, signed by the student/intern, parent/guardian, teacher, and employer. The plan should include competencies developed through classroom experiences, a list of on-the-job duties and tasks to be performed, and applicable student performance standards. The Financial Internship course may provide paid or non-paid work experience based on the needs of the students and availability of positions.

It is highly recommended that for every 20 students (or portion thereof) enrolled in OJT/Internship, the teacher/coordinator be given a minimum of one hour of OJT-coordination release time per day for the purposes of visiting students on the job and managing the cooperative method of instruction.

The teacher/coordinator should visit each intern/OJT site a minimum of once during each grading period for the purpose of observation, preferably while the student is actually working. A second contact during each grading period for the purpose of evaluating the student's progress in attaining the competencies listed in the job performance basic skills plan is highly recommended.

On-the-job training and internship may be continued as a summer learning experience without classroom instruction for those students who successfully participated in the program during the school year immediately preceding the summer assignment.

The OJT course may be taken by a student for one or more semesters at the secondary level enabling the student to earn multiple credits. The specific student performance standards that the student must achieve to earn credit must be specified in the OJT training plan.

In accordance with Rule 6A-10.040, FAC, the minimum basic skills grade level required for adult vocational students to complete this program are: Mathematics 9.0, Language 9.0, Reading 9.0. These grade-level numbers correspond to grade-equivalent scores obtained on one of the state-designated basic skills examinations. If a student does not meet the basic-skills level required for completion of the program, remediation should be provided concurrently through Vocational Preparatory Instruction (VPI). Please refer to the Rule for exemptions.

To be transferable statewide between institutions, this program/course must have been reviewed, and a "transfer value" assigned the curriculum content by the appropriate Statewide Course Numbering System discipline committee. This does not preclude institutions from developing specific program or course articulation agreements with each other.

When offered at the postsecondary adult vocational level, this program may be offered in courses. Vocational credit shall be awarded to the student on a transcript in accordance with Section 230.643 F. S.

When a secondary student with a disability is enrolled in a vocational class with modifications to the curriculum framework, the particular outcomes and student performance standards, which the student must master to earn credit, must be specified on an individual basis. The job or jobs for which the student is being trained should be reflected in the student's desired postschool outcome statement on the Transition Individual Educational Plan (Transition IEP).

SCANS Competencies: Instructional strategies for this program must include methods that require students to identify, organize, and use resources appropriately; to work with each other cooperatively and productively; to acquire and use information; to understand social, organizational, and technological systems; and to work with a variety of tools and equipment. Instructional strategies must also incorporate methods to improve students' personal qualities, higher-order critical thinking skills, and problem-solving, technical, and literacy skills.

IV. **INTENDED OUTCOMES:** After successfully completing appropriate course(s) for each Occupational Completion Point of this program, the student will be able to perform the following:
